ABOUT ME

I am a Full Stack Engineer, specialized in Laravel and React.js. I have four years of experience in PHP and Laravel, enhancing application performance and implementing integrations, with a three-year track record of creating websites using React.js.

I thrive in team collaboration, having worked in more than 10 different squads, and have a strong passion for building successful products, such as São Paulo’s Film Commission App with more than 10,000 users. Additionally, I have experience in optimizing processes to increase customer satisfaction and efficiently solving project issues, along with advanced troubleshooting and bug fixing skills acquired throughout the years.

SKILLS

- Technical Skills: PHP, Laravel, Javascript, Typescript, Node, React, Angular, Tailwind, Styled Components, Vitest, Docker, HTML/CSS, JQuery, PostgreSQL, MySQL, AWS, Git
- Languages: Fluent in Portuguese (native), Conversational Proficiency in English
- Certifications: AWS Cloud Practitioner, Mastering Tailwind, Frontend Development with Angular

PROFESSIONAL EXPERIENCE

CITY CONNECT

Fullstack Engineer

Volta Redonda, RJ

JUL 2021 - Now

Led redesign of company’s website. Promoted within 12 months due to strong performance and organizational impact. Part of the core development team of a São Paulo’s City Hall app with more than 10,000 users.

- Full-stack Engineer responsible for building, implementing, and maintaining over 5 customized systems for different public organizations using mainly PHP and Javascript
- Overhauled the obsolete legacy source code of a production application, resulting in increased usability and reduced run time performance by 20%
- Led interactive client meetings with 10+ attendees, presenting project updates and progress in alignment with Scrum methodologies.

TATICA WEB

Backend Engineer

Volta Redonda, RJ

APR 2020 - Jul 2021

- Enhanced online presence for local businesses, achieving an average 30% increase in website traffic through SEO-driven strategies and feature enhancements
- I built and maintained web applications using HTML5, CSS3, Javascript, PHP, jQuery, Laravel, and Blade for local businesses.
- Assisted in the development of screens, mockups, and diagrams to enhance team organization, representing applications more accurately

UNIMED VOLTA REDONDA

Software Engineering Intern

Volta Redonda, RJ

MAR 2018 - Dec 2019

- Reduced patient treatment durations by 15% on the emergency department through the implementation of a real-time Oracle SQL based report, enhancing efficiency and patient care
- Enhanced hospital's internal efficiency optimizing diagnostic imaging procedures by 25% through the seamless integration of Matrix Diagnosis and Microdata Cockpit systems
- Played a significant role in migrating the legacy MV2000 system to the newer MVSoul, working closely with stakeholders, collecting and analyzing crucial requirements to ensure a smooth transition
- Integrated the health insurance team for four months, primarily using the TOTVS system, Protheus, and the Oracle SQL database.
